The information above shows the investment data of the AE Wealth Management Institutional Alpha Models - Fixed Income, Income, Income Primary, Income & Growth, Balanced, Growth, and Aggressive Growth ("The Models") as of 4/9/2018. This chart is for illustrative and educational purposes only and is not an offer of individual or personalized investment advice. Further, the information contained herein is not an offer or solicitation with respect to the purchase or sale of any security. Investing involves risk and is subject to loss of principal. The Models are managed by AE Wealth Management Investment Committee. The Models are expected to primarily consist of mutual funds and exchange traded funds. The Models are generally comprised of funds that invest in U.S. Large Cap, U.S. Mid Cap, U.S. Small Cap, International Large Cap, International Small Cap, Emerging Markets (All capitalizations), U.S. Aggregate Fixed Income, U.S. High Yield and U.S. TIPS. The Models generally consist of between 5 and 20 mutual funds and exchange traded funds, with a typical weighting for each position being between 0%-43% of the total portfolio. Each underlying fund in the Models has a designated minimum investment specified in the prospectus of that fund. Since the Models invest in mutual funds, an investor will indirectly bear fees and expenses charged by the underlying mutual funds in which the Models invest in addition to direct management and custody fees and expenses applicable to the Models. The Models are expected to consist of institutional share class equity mutual funds. The underlying mutual funds in the Models are limited to those with no sales loads or 12(b)-1 fees.
