

Institutional ETF - Income Primary

Another strategy is to find a steady option at the lowest available cost. By leveraging products called exchange-traded funds (ETFs), which are products to help us trade efficiently, we strive to find the various sectors in the market that we feel are most appropriate to meet your objectives. Institutional ETF is designed for the more fee-conscious client still looking for ways to discover some upside capture in the overall market environment.

Let's use the same baseball analogy.

Again, we are the general manager of a team that has been inherited. We didn't get the opportunity to choose the players, but we still know they are great players creating a great team because we have defined the type of player we want; ETFs and index funds.

What we get to do is take the players that we have and coach them. We can also put them in the positions we want and make adjustments throughout the game. Institutional ETF is looking at taking a lower cost aspect, a more efficient look at the market, and still making risk-adjusted improvements for clients.

By manipulating core features of those funds, we have a way to make moves as the environment changes ahead of us to proactively respond to the market conditions and make adjustments on behalf of clients to give the best risk-adjusted terms to clients.

Unlike Institutional Alpha, where we pay managers and players more to get an additional benefit, the Institutional ETF strategy says it doesn't matter if we have the highest profile player for a price or not. What we want is to coach these players the way we need to. This model can be a very strong overall strategy or a nice complement to another actively managed model.

Annual Returns for selected Key Indices – 01.01.2008 – 12.31.2017. Past performance does not guarantee future results. This chart is for illustrative and educational purposes only and is not an offer of individual or personalized investment advice. Further, the information contained herein is not an offer or solicitation with respect to the purchase or sale of any security. It is not possible to invest in an index. Please contact your investment adviser for a description of the representative indices. Investing involves risk and is subject to loss of principal. The Model is managed by the AE Wealth Management Investment Committee and is expected to primarily consist of exchange traded funds (ETFs). The Model generally consists of between 2 to 15 ETFs, with a typical weighting for each position being between 0%-97% of the total portfolio. The Model is generally comprised of ETFs that invest in U.S. Large Cap, U.S. Mid Cap, U.S. Small Cap, International Large Cap, International Small Cap, Emerging Markets (All capitalizations), U.S. Aggregate Fixed Income, U.S. High Yield and U.S. TIPS. Allocation weights in the Model are based on the style/mandate of the underlying funds. Since the Model invests in ETFs, an investor will indirectly bear fees and expenses charged by the underlying funds in which the Model invest in addition to direct management and custody fees and expenses applicable to the Model. The funds comprising the Model as well as the allocation weightings are subject to change.
