

ASSET ALLOCATION UPDATE

- We recommend a neutral weight to Global Equities and Fixed Income across models.
- Within the equity allocation, we recommend an overweight to U.S. Equities and Emerging Markets and underweight to International Developed Equities.
- Within the fixed income allocation, we recommend a mild overweight position to the Long U.S. Government sector following a significant upward move in U.S. Treasury yields.

EQUITY HIGHLIGHTS

- Global equities, as defined by the MSCI ACWI IMI, returned -7.82% in October. The U.S. represented the top performing geographic segment for the month, though still posting sharp losses of -7.36% (as defined by the Russell 3000). International developed and emerging markets posted losses of -8.18% and -8.91%, respectively (as defined by the MSCI World ex-U.S. IMI and MSCI EM IMI indexes). Value materially outperformed growth worldwide during the month.
- The environment for actively-managed equity strategies has been more challenging so far in 2018 when compared to 2017, particularly in the U.S. large-cap, U.S. small-cap value, and international developed large-cap segments. Narrow market leadership trends in the U.S. and abroad (largely from the information technology sector) have created headwinds for active managers year-to-date.
- U.S. growth equities have outperformed value by a wide margin since the global financial crisis, driven partially by a prolonged low economic growth environment and significant outperformance from large-cap technology and consumer discretionary companies. Stretched growth valuations and accelerating economic growth are conditions that could lead to an improvement in value relative performance. The month of October did see value outperform in all three geographic segments of the equity market (U.S., international developed, and emerging markets).

FIXED INCOME HIGHLIGHTS

- For the second consecutive month, October saw the U.S. bond market generally underperform its foreign counterparts. Within the opportunity set, the only sector to produce a positive monthly return was foreign developed government bonds, up 0.33%. Domestic government securities produced a negative return, down 0.47%. Within corporate credit, investment grade outpaced high yield -1.40% vs. -1.60%. The Bloomberg Barclays U.S. Aggregate Bond Index, a proxy for the overall bond market, returned -0.79% in October.
- Over the month, 10-year government bond yields in Italy moved higher, while corresponding rates in Germany, France in the U.K. moved lower. Domestic rates, as represented by the yield of the 10-year Treasury, moved higher by 10 bps from 3.05% to 3.15%.
- Municipal/Treasury yield ratios across the curve moved higher in October, although ratios remain below historical averages.

Eurozone data as of 10.31.2018. U.S. and Japan data as of 09.30.2018; Source: FactSet; The sudden increase in Japan CPI growth in 2014 coincided with an increase in national sales tax that impacted final price levels.

U.S. - Unemployment Rate

Data as of 10.31.2018; Source: FactSet

- GDP growth in Europe and Japan has moderated recently while U.S. growth has remained strong.
- Year-over-year U.S. productivity growth of 1.3% as of the end of the third quarter is an improvement over recent years. Sustained productivity growth is essential to drive long-term real growth. Year-over-year industrial production growth continues to surge and is at multi-year highs.
- U.S. inflation has moderated recently to roughly a 2% annual rate while European inflation has stabilized slightly above 1%. Japan inflation has ticked back up to a positive, but very low level.
- U.S. Employment growth remained strong in October, and the unemployment rate held steady at a forty-year low of 3.7%.

Note: Please see Appendix for important definitions.

Leading	Initial Jobless Claims	<ul style="list-style-type: none"> In the week ending October 26th, the four-week moving average of Initial Jobless Claims was 213,750 an increase of 1,750 from the previous week's revised average of 212,000
	Manufacturing	<ul style="list-style-type: none"> ISM Manufacturing registered 57.7% in October a 4.4 percentage point decrease over the previous reading. A reading below 50.0% indicates contraction. ISM Manufacturing New Orders registered 57.4% in October a 3.3 percentage point decrease over the previous reading. ISM Non-Manufacturing registered 60.3% in October a 1.3 percentage point decrease over the previous reading.
	Housing/Construction	<ul style="list-style-type: none"> Building permits increased 1.7% in September and have risen 1.3% over the past year.
Coincident	Consumer Confidence	<ul style="list-style-type: none"> The Consumer Confidence Index fell in October to 137.9 compared to 138.4 in September.
	Nonfarm Payrolls	<ul style="list-style-type: none"> Total nonfarm payroll employment gained 250,000 in October while the unemployment rate remained at 3.7%.
	Industrial Production	<ul style="list-style-type: none"> Industrial Production rose 0.25% in September and is up 5.14% over the past year.
	Personal Income	<ul style="list-style-type: none"> Real Disposable Personal Income increased 0.07% in September and is up 2.87% over the past year.
Lagging	Ratio of Consumer Installment Credit to Personal Income	<ul style="list-style-type: none"> This ratio rose 0.13% in September and is up 0.36% year-over-year. Consumer borrowing tends to lag improvements in personal income by many months because people remain hesitant to take on new debt until they are sure that their improved income level is sustainable.
	Inflation	<ul style="list-style-type: none"> CPI (All Items) rose 0.1% in September and is up 2.3% over the trailing one year period. CPI (Core) rose 0.1% in September and is up 2.2% over the trailing one year period.

Appendix

Core Consumer Price Index: Core inflation is a measure of inflation that excludes certain items, usually food and energy, that face volatile price movements.

Option Adjusted Spread (OAS): A bond's yield spread over comparable maturity government bonds, adjusted for any embedded options.

Real GDP: Real gross domestic product (GDP) is an inflation-adjusted measure that reflects the value of all goods and services produced by an economy in a given year, expressed in base-year prices.

Revenue to Firm Value: Total Index Revenues of the past 12 months divided by the sum of equity market value and the value of total debt. This is a measure of total sales generated on the total value (debt plus equity) of firms in the index.

TIPS Breakeven: The inflation rate implied by the spread in yield between U.S. TIPS (Treasury Inflation Protected Securities) and nominal U.S. Government Bonds of equal maturity.

U.S. 3 yr. Real Revenue Growth, Russell 3000 Non-Financials: For the Russell 3000 excluding financial firms, the percentage change in trailing 12-month inflation adjusted revenue over 12-month inflation adjusted revenue three years prior.

U.S. Cyclically Adjusted Earnings Yield: The 10-year average of annual, inflation adjusted earnings divided by the current inflation adjusted price of the S&P 500 index. This measure is the inverse of the Shiller CAPE Ratio.

YOY US Productivity Growth: The year-over-year growth in real U.S. output produced per hour worked for non-farm workers.
